**Abstract:**

This research deals with the developing of power and different abilities (military, security, economy, technology and scientific excellence)

The research shows that the excellence of the Chinese economy and its development , had a positive reflection on the other powers and abilities , it means it is a base of development in all fields.

The development in power and Chinese military abilities had a clear effect on Chinese strategic creed , and that what the research deals with in some details. The research also deals with developing Chinese nuclear abilities. The research doesn't ignore the security eye that indicates to the protection of the state sovereignty, concentrating on the unity and safety Chinese lands. The research also deals with the Chinese power and abilities in their two parts internal and external , at the internal level , the Chinese economic development has been noticed through different stages , also dealing with the decisions the lead to this development, at the level of power and external abilities , the research indicated to (BRICS , BRI) as an example of this power and abilities, the research didn't forget the power an technology abilities and Chinese scientific excellence , and its path by creating researches centers for developing , training and cooperating with the researchers, and how to close the gap that separates China from the west , the research also indicates to the development of space technology.
